

Intelligent Solutions for Critical Environments®

aislePRO™
Custom Containment, Simplified.

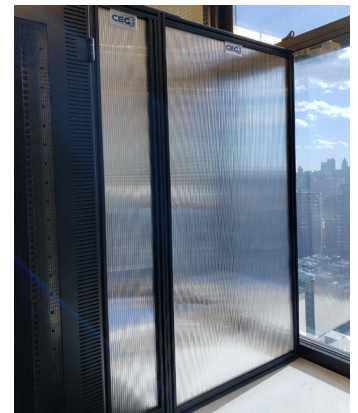

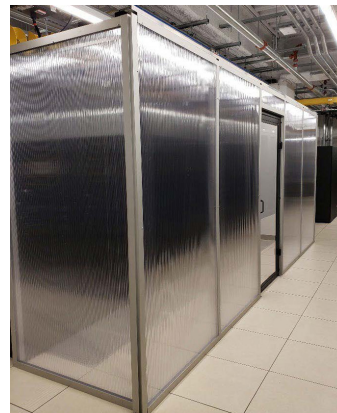

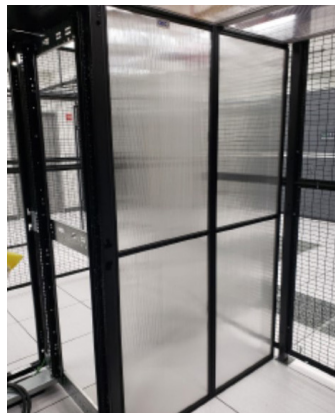

aislePRO™ BARRIER PANELS

Performance & Efficiency don't have to be Complicated

Premier barrier panels custom-designed to fit your unique IT environment, yet easy to order and install as modular containment.

CEG can design and manufacture the highest-quality panels to accommodate all kinds of gaps or align any rack landscape – no onsite visit required! And because aislePRO™ panels are made to your exact measurements, installation is a breeze. Thanks to our detailed, yet simple instruction manuals, CEG's panels are the data center industry's easiest to install.

CEG offers standard-style horizontal and vertical panels, heavy-duty panels, and field adjustable panels.

Standard Barrier Panels

Standard size vertical panels are primarily used to fill gaps between equipment racks, pillars, and other obstructions. Standard size horizontal panels are typically used above racks to even out cabinet heights in-row that have the 'city skyline' layout.

CEG's standard panels use 1.0" extruded aluminum frames with 6mm twinwall inserts.

aislePRO™ BARRIER PANELS

Heavy-duty Panels

CEG's heavy-duty panels are used for structural purposes. They can serve as structural valance panels on either side of our doors to accommodate wide aisles, adjust for uneven 'offsets' at the aisle ends, and anywhere else where a panel is needed for support.

Our heavy-duty panels use 1.5" extrude aluminum frames with 8mm twinwall inserts.

- Custom Sizes
- Field Adjustable Sizes
- Easy to Order, Easy to Install
- Rigid Design
- Usable in Hot & Cold Aisles
- Improves Rack Density
- Fill in Spaces Between Racks
- Extend Rows to Create a Wall System
- Saves Energy, Lowers Costs
- Creates a Greener Data Center Environment

Field Adjustable Panels

Need superior-quality barrier panels but don't have exact measurements handy? CEG can also provide Field Adjustable Panels that are much easier to size and install than any other modular solution.

aislePRO Field Adjustable Panels ship fully assembled at fixed, standard sizes but can be easily disassembled and reduced in size, both in width and height.

FIELD ADJUSTABLE PANELS

WIDTHS: 24", 36", 48"

HEIGHTS: 84", 96"
